

RIH - Review of Inventions
in Horology SCBT-CENTREDOC

RIH & RIH ASIA Review of Inventions in Horology

OUR SOLUTION

Review of Inventions in Horology proposed by SCBT-CENTREDOC is a unique source in the world with more than 50 years of existence.

It provides a monthly report on new patents published in the fields of mechanical and electronic watchmaking, as well as related branches such as exterior parts, bracelets and electronic components. Novel manufacturing processes and development of new materials for watch components are also reviewed each month.

SCBT-CENTREDOC has developed a comprehensive and exhaustive database which is an essential resource for the actors in the watch industry. It enables you to be aware of the patenting activities of your competitors and to discover the most recent developments in the branch. You'll be able to easily navigate through the latest innovations with our detailed categorization scheme, where patents are classified with respect to the specific component or functionality that is protected by the invention (calendar, dial, escapement mechanism, etc.).

RIH covers patent publications from more than 65 patent offices with the exception of China, Japan, South Korea and Honk-Kong which are specifically covered by RIH-Asia.

RIH-Asia perfectly complements RIH, for anyone wishing to keep updated on the latest developments of the Asian watchmaking industry.

Review of Inventions in Horology in a nutshell :

- Monthly updates
- Exhaustive database
- Possibility of choosing a specific sub-topic (mechanical, bracelets, etc.).
- Worldwide coverage by combining RIH and RIH Asia.
